Bradford, UK

PERSONAL PROFILE

Over 2 year of production experience, I have delivered many web pages from the first line of code to production all by myself. I excel in front-end software development, and I consider myself to be a hands-on technologist first, an architect second, and a team player above all. I am recognized for assessing operational needs and delivering exact requirements given.

SKILLS AND ABILITIES:

- Proficient with the use of React.js, JavaScript, Next.js and TypeScript and other frontend technologies for building web application.
- Highly skilled at API integration.
- Experienced in application deployment using HTML | CSS | Handlebar.
- Good knowledge of SASS.
- Proficient with the use of Version Control tools such as Git and GitHub

FRONTEND WEB DEVELOPER
